Remanufactured or new, it's what we do.

Brake Calipers.

Quality remanufactured in the heart of the UK.

Unsurpassed quality range

Our Premium Remanufactured Brake caliper range consists of 5,530 part numbers and offers 95% availability of the most popular vehicles on the road, from stock.

With nearly 80% of the vehicle car parc covered by just a fifth of our range, you can be sure that we'll have what you want, when you want it.

Should you need an unusual caliper, we also offer a same day dispatched 'Recon & Return' service. All calipers are supplied in anti-corrosion rust prevention packaging to extending the part shelf life and to ensure that your remanufactured caliper reaches you 'factory fresh'.

Remanufacturing as it should be

To us, remanufacturing isn't just a poorer substitute for 'new' - it's a process which results in components that are as good as new and perform that way, too. We've been doing it since 1979, so we know what we're talking about

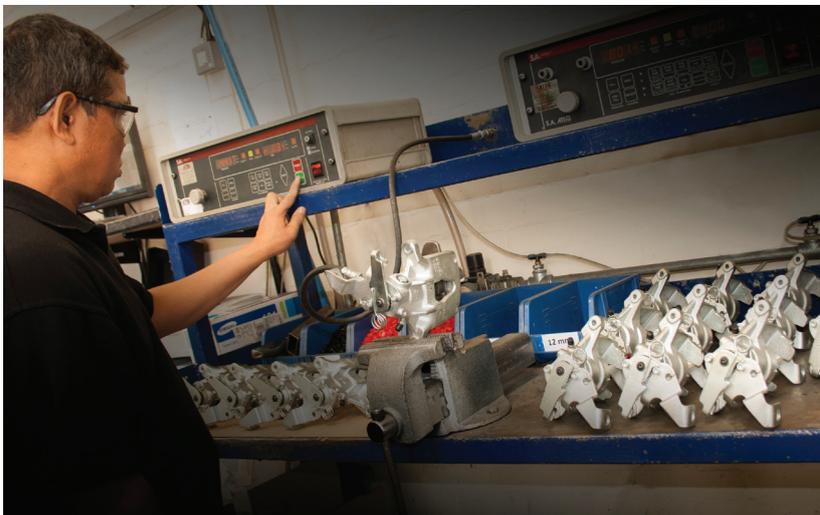

Take our range of Brake Calipers. Each one is stripped right back to the original casting, inspected to ensure that there are no defects, refurbished to the original state and then reassembled by hand using all new components.

That means 100% new pistons, springs, actuation and seals. Nothing is left untouched and everything is completely renewed to the highest quality of ISO 9001/2000.

After assembly, each individual caliper is 100% pressure tested beyond the capacity experienced on the vehicle. That's why we're confident to be able to supply a 24 month 38,000 km. warranty.

At Shaftec, everything we do is carried out under one roof at our remanufacturing plant in the heart of the UK.

To find out more about the full Shaftec range of Brake Calipers, Steering Racks, Steering Pumps and Driveshafts, as well as our new Driveshafts, CV Joints, Steering Pumps, CV Boots and Steering Gaiters, contact us by e-mail at info@shaftec.eu or visit us at www.shaftec.eu
